

PRESS RELEASE

MARCH 2021

RENAULT TRUCKS T X-64, THE NEW EXPORT MODEL FROM THE USED TRUCKS FACTORY

Renault Trucks is continuing to expand its range of used trucks with the launch of a new model converted at the Used Trucks Factory in Bourg-en-Bresse: the Renault Trucks T X-64 Euro III, designed for export to the African and Middle Eastern markets.

Renault Trucks is launching sales of a new custom-built model, named the Renault Trucks T X-64, from its Used Trucks Factory, a specialised conversion workshop integrated into the Bourg-en-Bresse manufacturing site*. This vehicle is converted using very strict industrial processes and is specifically intended for customers operating in Africa and the Middle East.

A truck "re-made in France"

With a change of stringers, suspensions, axles and conversion of the power train, the Renault Trucks T X-64 comprises over 50% of new original parts.

It is fitted with a new ultra-robust 6x4 300 mm chassis with a three-axle profile, allowing a load of 8 tons on the front axle and 26 tons on the rear. For optimum driving comfort and perfect control of the vehicle in any situation, the Renault Trucks T X-64 is fitted with an Optidriver robotized gearbox with off-road mode and manual acceleration.

Based on a Renault Trucks T Euro VI converted into Euro III, the Renault Trucks T X-64 guarantees the highest level of pollution control as applied in Africa and the Middle East. The Used Trucks Factory operators begin the conversion by dismantling and recycling the Euro VI components (silencers and AdBlue components) before installing the Euro III parts. As with new engines, this conversion is certified by an external body and guarantees the original power and torque.

The air and diesel filters are also reinforced, enabling the vehicle to adapt to its new environment (topography and the characteristics of locally-available fuel). Finally, ground clearance is increased to ensure protection of the underbody on rough terrain.

The manufacturer's software and documentation are updated to ensure the vehicle, with its new specifications, is recognised and maintained throughout the network.

Finally, the Renault Trucks T X64 comes with a manufacturer's warranty of 18 months or 180,000 km, which covers all components of the powertrain and is valid throughout all Renault Trucks sales and service outlets.

** Used Trucks Factory conversions are conducted using recent used trucks that have been rigorously selected and subjected to over 200-point inspections. Each conversion has been specifically studied by Renault Trucks' design and quality engineers. The industrial manufacturing and quality control processes meet a level of requirements comparable to those applied in the manufacture of new vehicles.*

About Used Trucks by Renault Trucks

The Used Trucks by Renault Trucks label embraces all of the manufacturer's operations in the used-vehicle business.

Used Trucks by Renault Trucks is underpinned by three key assets: a commitment to quality and transparency in the selection and preparation of the vehicles; a range of tailored vehicles and services; a locally-based network to serve its customers.

About Renault Trucks

Building on a legacy of more than a century of innovative French truck know-how, Renault Trucks supplies transport professionals with a range of vehicles (from 2.8 to 120 t) and services appropriate for distribution, construction and long-distance transport. Renault Trucks vehicles are sturdy and reliable with low fuel consumption enables them to deliver greater productivity and control operating costs. Renault Trucks distributes and maintains its vehicles via a network comprising more than 1,400 service outlets worldwide. The design and assembly of Renault Trucks vehicles, as well as the production of most components, is carried out in France.

Renault Trucks is part of the Volvo Group, one of the world's leading manufacturers of trucks, coaches and buses, construction equipment and power solutions for marine and industrial applications. The Group also provides comprehensive financing and servicing solutions. The Volvo Group employs around 104,000 people, has production facilities in 18 countries and sells its products across more than 190 markets. In 2020, the Volvo Group's net sales came to EUR 33.4 billion (SEK 338.4 billion). The Volvo Group is a listed company headquartered in Gothenburg, Sweden. Volvo shares are listed on Nasdaq Stockholm.
