RENAULT TRUCKS T, C, K ÉVOLUTION: A TURKISH PLAYER WINS THE INTERNATIONAL DESIGN COMPETITION IN EURO TRUCKS SIMULATOR 2!

At a live event organised on Thursday 8 July on the Twitch account of SCS Software, the publisher of the Euro Trucks Simulator 2 game, Renault Trucks announced the winner of the international design competition launched last May. Enes Bolat, an 18-year-old Turkish student, has won the competition.

With more than 2,200 hours of gameplay under his belt, 18-year-old Enes Bolat is a passionate Euro Trucks Simulator 2 player. However, the young Turkish student has no plans to become a truck driver, but rather to pursue a career in IT. Enes Bolat created his own design using image processing software. *"To produce this design, I was inspired by the world of rally cars. I created a template using dedicated software, then I modelled it and transferred it to the game"*, explained the young man, who spent two weeks designing his Renault Trucks T High in 3D.

In his design, Enes Bolat used three main colours, red, black and shades of grey. He emphasised and accentuated the design of the headlights by adding red stripes.

In a nod to rally cars, a chequered pattern encircles the cab and the brand's logo completes the front of the truck. On the sides, a set of black lines adds an effect of velocity and gives a slender appearance to this vehicle, which has been named the "Renault Trucks Diamond Evolution".

"Of course, I was familiar with Renault Trucks from Euro Trucks Simulator 2, but it was after the launch of the new models in the game that my interest in the brand grew," continued Enes Bolat. "I immediately liked the aesthetics of the T and the T High Evolution, especially the new headlight design. The speech by the Renault Trucks design director motivated me to take part in the competition." The young student never imagined however that he would clinch first place. "It's incredible to win an international competition in this game that I have enjoyed playing for many years and to have my design officially included in the game."

Yesterday evening, during the event organised by Renault Trucks and SCS Software on the publisher's Twitch account, Enes Bolat also had the pleasure of discovering his design on a real Renault Trucks T High.

About Renault Trucks

Building on the legacy of more than a century of French truck know-how, Renault Trucks supplies transport professionals with a range of vehicles (from 2.8 to 120 T) and services adapted to the segments of distribution, construction and long distance. Renault Trucks vehicles are sturdy and reliable with low fuel consumption that enables them to deliver greater productivity and control operating costs. Renault Trucks distributes and maintains its vehicles through a network of more than 1,500 service points around the world. The design and assembly of Renault Trucks vehicles, as well as the production of most of the components, are carried out in France.

Renault Trucks is part of the Volvo Group, one of the world's leading manufacturers of trucks, coaches, buses, construction machines, and industrial and marine engines. The group also offers complete financing and service solutions. The Volvo Group employs around 105,000 people, has production plants in 18 countries and sells its products in more than 190 markets. In 2020, Volvo group sales amounted to 33.4 billion euros (338.4 billion Swedish crowns). The Volvo Group is a listed company with registered offices in Gothenburg, Sweden. Volvo shares are listed on the Nasdaq Stockholm Stock Exchange.
