

## Press release

February 2023

# Paris 13<sup>th</sup> district opts for 100% carbon-free waste collection using 18 electric Renault Trucks vehicles

**SEPUR, an expert in waste collection and management, has taken delivery of 18 Renault Trucks E-Tech D Wide to collect household waste throughout the 13<sup>th</sup> district of Paris. These all-electric refuse collection vehicles are already criss-crossing the streets of the French capital to collect waste from the 180,000 residents of the district, with no local CO<sub>2</sub> emissions or noise pollution.**

To meet the carbon footprint reduction and climate change targets set out in the Paris Climate Plan, the waste of the inhabitants of Paris 13<sup>th</sup> district is now collected by all-electric refuse trucks. This is a major step forward by the municipality in reducing its environmental impact and improving the quality of life of its residents.

To collect the waste of the 180,000 inhabitants of the 13<sup>th</sup> district of Paris on a daily basis, Sepur, an expert in waste collection and management, has put a fleet of exclusively electric trucks into service. From now on, 18 Renault Trucks E-Tech D Wide bodied by Semat will carry out around one hundred collections per week, which means that 21 tonnes of CO<sub>2</sub> emissions will be avoided per week compared with collections carried out using trucks running on natural gas.

## Sepur and Renault Trucks, two partners committed to decarbonising transport

Sepur and Renault Trucks have made strong commitments and are pursuing ambitious policies to reduce the environmental footprint of their activities:

*"It's in our DNA to offer local authorities the most sustainable transport possible. Since 2014, we've been converting our fleet to reduce our greenhouse gas emissions. We've set ourselves the goal of eliminating diesel-powered vehicles from all our collections by 2025", announced Sepur CEO, Youri Ivanov.*

*"Electric mobility is the cornerstone of Renault Trucks' strategy for carbon-free transport. We're aiming for 50% of our sales to be electric by 2030 and, by 2040, all the vehicles we sell will run entirely without fossil fuels", explained Bruno Blin, President of Renault Trucks. "The commissioning of these 18 electric refuse collection vehicles marks an important step in the city's progress towards clean and sustainable mobility. We are proud to play a role in this, alongside Sepur."*

### About Sepur

As a leading municipal waste collection operator in France, Sepur has been carrying out a public service mission for the benefit of our living environment for 60 years. This mid-sized company is present in most areas of the waste value chain: municipal waste collection in urban areas and collection for industrial players, sorting and recovery of bio-waste, and urban cleansing.

- En 2020, Sepur collected 1.7 million tonnes of waste from individuals and companies.
- En 2021, Sepur supported nearly 1,300 municipalities in 25 departments of the Ile-de-France region, benefiting 10 million inhabitants.
- With this strong local presence, Sepur is deploying its expertise in new metropolitan areas.

### About Renault Trucks

Renault Trucks, the French truck manufacturer, has been providing professionals with transport solutions since 1894, from light commercial vehicles to heavy duty tractors. Committed to energy transition, Renault Trucks offers fuel efficient vehicles and a complete range of 100% electric trucks, with their operating life extended through a circular economy approach.

Renault Trucks is part of the Volvo Group, one of the world's leading manufacturers of trucks, buses, construction equipment and industrial and marine engines. The group also provides complete financing and service solutions.

#### Key figures:

**9,450 employees worldwide**

**4 production sites in France**

**1,400 sales and service points worldwide.**

**54,000 vehicles sold in 2021**
