MARCH 2025

Renault Trucks unveils The Good City, the 100% decarbonised city

What if the zero-emission city already existed?

Renault Trucks presents *The Good City*, an interactive town that reflects the increasing electrification of transport. This online platform immerses users in an urban ecosystem where all transport operations are carried out using 100% electric vehicles. Through video reports filmed at professional sites, *The Good City* provides a tangible illustration of electric mobility in daily operations and how it meets the needs of transport operators.

Beyond demonstrating the operational reality of electromobility, these real-world experiences offer a glimpse into the city of tomorrow – where the widespread adoption of battery-electric technology, while ensuring the essential supply of goods and waste collection, will promote better coexistence between vehicles and city dwellers.

Renault Trucks launches *The Good City*, an innovative online platform open to all. Designed as a fully interactive city, it offers intuitive navigation with two levels of exploration:

- **Industry segments:** urban construction, regional distribution, waste collection, craftsmanship, road maintenance & green spaces, and urban logistics.
- **Use cases:** for each segment, video reports showcase how Renault Trucks electric vehicles are integrated into the daily operations of transporters, artisans, and local authorities – whether they involve heavy-duty trucks from 16 to 50 tonnes, light commercial vehicles, or cargo bikes.

New use cases will be added regularly to enrich the platform.

■ ***The Good City: a quieter, more sustainable city within reach***

Noise reduction, improved air quality, easier access to city centres, better working conditions for drivers, and enhanced quality of life for residents: the benefits of electromobility extend beyond the transport sector alone.

By linking these different aspects, *The Good City* envisions an environment where living and working conditions are greatly improved – a quieter, more sustainable city: a desirable and tangible future made possible through electric mobility.

THE GOOD CITY IN NUMBERS

0 carbon

6 segments

29 use cases

2,200 Renault Trucks electric medium and heavy-duty vehicles ($\geq 16t$) in operation.

45,000,000 km covered by Renault Trucks electric medium and heavy-duty vehicles.

44,000 t of CO₂ saved (equivalent to the annual emissions of a 5,000 inhabitants town).
