# **Eurosatory 2026: Renault Trucks' expertise serving armed forces**

**At Eurosatory, taking place from 15 to 19 June 2026 at the Paris Nord Villepinte Exhibition Centre, Renault Trucks will showcase its range of vehicles designed for defense and security applications. At its outdoor stand (PE6A – stand C180), Renault Trucks will display two vehicles that demonstrate its expertise in military logistics and off-road transport.**

As a truck manufacturer with more than a century of experience, Renault Trucks places its industrial know-how and heavy-duty vehicle expertise at the service of armed forces. Vehicles intended for military applications are produced at Renault Trucks' plants in Bourg-en-Bresse (Ain) and Blainville-sur-Orne (Calvados), on the same assembly lines as the brand's trucks designed for demanding civilian operations.

## **■ Industrial capability supporting armed forces**

From 15 to 19 June 2026, at Eurosatory, the world's leading Defense and Security exhibition, Renault Trucks will highlight a range of vehicles configured to meet military requirements. Each year, Renault Trucks manufactures tens of thousands of trucks at its French production facilities. This industrial capacity enables the company to supply vehicles tailored to military needs, including large volumes delivered within short lead times.

Renault Trucks also relies on an ecosystem of local partners in numerous countries, including bodybuilders, system integrators and armour specialists—to provide solutions adapted to the specific operational requirements of each armed force.

The Renault Trucks Emergency & Defense division markets vehicles capable of operating in a wide range of climatic and geographical environments. These heavy-duty vehicles are used daily

by armed forces, as well as by civilian organisations operating under demanding conditions, including emergency and fire services and humanitarian organisations. Over the past three years, Renault Trucks has delivered several thousand military vehicles to more than twenty countries.

### ■ Vehicles designed for operational readiness

Renault Trucks vehicles supplied to armed forces benefit from the quality, robustness and reliability standards developed for the most demanding professional transport operations. They are engineered to deliver a high level of operational availability while ensuring controlled operating costs.

The manufacturer supports vehicle maintenance and spare parts availability through its international network of 1,450 distribution, repair and service points. Renault Trucks also provides armed forces with its expertise in vehicle maintenance and technician training.

Drawing on its industrial expertise, service network and extensive experience of intensive-duty operations, Renault Trucks aims to contribute to strengthening military logistics capabilities while helping preserve French and European strategic autonomy and industrial sovereignty.

### **About Renault Trucks**

*Renault Trucks, the French truck manufacturer, has been providing professionals with transport solutions since 1894, from electric cargo-bikes and light commercial vehicles to heavy duty tractors. Committed to the energy transition, Renault Trucks offers fuel efficient vehicles and a complete range of 100% electric trucks, with their operating life extended through a circular economy approach.*

*Renault Trucks is part of the Volvo Group, one of the world's leading manufacturers of trucks, buses, construction equipment and industrial and marine engines. The group also provides complete financing and service solutions.*

#### **Key figures:**

10,000 employees worldwide

4 production sites in France

1,450 sales and service points worldwide

55,011 vehicles sold in 2025
